I. Transportation Situation in Atlanta

1. Glad to participate - we have been working with your CCT team to develop the program for Phase II and are glad to be a part of its presentation.
2. I would like to bring you up-to-date on the transportation situation as the background for the CCTP program. Then Collier Gladin will describe our overall transportation program, and will describe our growing Center City and our programs for it. Allan Sloan will tell you what we have planned for the CCT operation.
3. CCT came into town just at the time when we were adjusting our strategy and tactics after the transit referendum was not approved. As a result of this defeat, we have been mobilizing our forces to get the kind of public support needed to develop the system Atlanta will need.
4. First, we have been spending time to ^{getting} get our various agencies and governments in the region planning and working on one. Despite the problems, this is coming about. Leadership changes - Mayor - MARTA - refocusing. ~~Feds~~ ^{a common} ~~are refocusing~~ ^{system} - to - need some stability from
5. Second, we have been developing a more concious program to get wide-spread public support and involvement throughout the various planning and implementation phases - Citizens Advisory Committee of AATS.
6. Third, we have been detailing our regional plan.
7. Fourth, developing new action projects.

We learned some valuable lessons most important is not to try to run anything down the throat of the voters.

of this is real breakthrough we are actually talking with the highway, Dept. Wash - No steady plan, financing as result we can't service our locals.

PRAGMATIC COMBINATION OF PLANNING AND ACTION.

Collier will describe in more detail
