community remains residental. They applauded very loud again.

Amotion was made to tell Model Cities and the City Of Atlanta to rehibilitate Pittsburgh, and to bring all the services into the community. The grant for the peoples, etc. The motion was seconded and unamiously carried.

Mr Johnson asked the group to elect some representatives to form a committee and he will meet with them at any time. They agreed to do this.

## " HOW PRYOR STREET SCHOOL GOT BUILT"

-Sunday Oct. 27. Pryor St. School Dedication Program-Mr. Edward Moody the past P.T.A. President at Pryor St. School was on the program, and he preceded Dr. John W. Letson the guest speaker. Mr Moody said he chose the subject, in order that the record will be straight. He spoke,

I would like to take you back to the year 1965. The Parents at that time was having a fairly good P.T.A. with the teachers and Principle at Pryor St. School. Mrs Reed was the patrol-lady, and also ->> served as the President of the P.T.A.

A nominating committee was appointed by her to nominate a new slate of officers to succeed the out going administration I was asked if I would like to accept the office of President to be in the nomination. I accepted Then the P.T.A. met I was elected.

In the 1963 Bond Issue funds was voted on to acquire adjacent property to build a new Pryor St. School. In the acquisitin process 24 families had to give up their homes. Some of these homes were almost paid for. So these families had to go in debt all over again. This was a strain on most of them because of their age.

It was askedof that P.T.A. of 1965 that the school board be forced to carry out this committment. It was noted by several of the owners that Thomasville had a ochool in the 1957, and 63 bond issue and even today that school has not been built Having the two school previously been listed in two bond proposals the feeling was that the board would likely do the same thing, plan but not build.

The families that had to move, pledged to make the board build a new school on the land they had to give up. "ith a delegation of parents I as the President Assisted by the Principle started a vigirous approach upon the board at each of its meetings. Our appearence before the board caused the board to adopt a policy that is in effect now. After continuing this for some time Pryor St. School got seniority promises and was among the first school four to be built, in the 19 66 bond issue approval.

It takes more then a new building to educate our childrens. It takes the interest of the teachers, the principles, the administration, and the praents. It is the kind of cirriculmn that the school has that makes it educational or dis-interesting. Put all of these ingredients together and you will have a compound combination. This school should not be dedicated to any individual, or to any group, but to the education of the children, thats what it should be dedicated Let this combination dedicate thems-
