

If this nation is to survive and prevail during the next century in its life-or-death struggle against Communism, its most vital single asset must be the mental and moral strength of its children. Yet, we are faced today with the tragic picture of callous, selfish, national politicians bartering away this priceless possession in a frantic race to gratify minority pressure groups and to present to the rest of the world an illusory image portraying the United States as a classless society.

Despite the shameful aftermath of school integration in New York City and Washington, D. C., despite incontrovertible statistics showing that the per capita crime rate among negroes is at least ten times as great as that of the whites, the Federal juggernaut rolls inexorably forward, as though following a blueprint to miscegenation, grinding States Rights into the dust and mocking the ideal of government by powers derived from consent of the governed.

Must the South suffer a Congolese debacle, must every white girl be ravished, must every white boy be felled by a spring-blade knife, must the white race be degraded to the mire of sensualism, before the stark, elemental truth is acknowledged.....that there is a vast difference which has nothing to do with color of the skin?

I had the misfortune of spending the first twenty years of my life in close association with negroes and for five of those years ours was the only white family within a radius of a half-mile on every side. That, I am sure, is a more comprehensive background than that of the nine Supreme Court justices and Myrdal, the exotic new fountainhead of American jurisprudence. Needless to say, I intend to spare my children a similar unedifying apprenticeship, even if it entails transferring them from parochial schools to private schools, and, if necessary, dissolving my business and moving to a western state (California excluded). It is difficult enough to rear children properly today, besieged as they are by the tempting, lurid fare of TV, movies, and magazines, without further exposing them to perilous association with young negroes who have been whelped in the sordid environ of incest, illegitimacy, unbridled sex without love, syphilis and gonorrhoea, and addiction to gin, marijuana, muscatel wine, and the latest panacea, heavily drugged cough syrup.

The typical young negro male believes that his only reason for existence is the riotous indulgence of his genital organs. The average young negress is the very symbol of promiscuity. If this genocidal program of school integration is pursued, you can be sure that most white children will have been indoctrinated to the facts of life before the age of ten in the most uncouth, vulgar manner conceivable. I do not hate the individual negro, but, considered ethnically, they are the dregs of humanity and that condition will be changed only by painfully slow evolution, not by reams of mandates from Washington, D. C., proclaiming "equality",

I have little doubt about the outcome of the pending if only because of the pragmatic reason that the central government has more tanks and bayonets than the states and that immense, elastic tarpaulin, "Equal Protection of the Law", can always be stretched a bit more. Your tenure in this world will expire in the next twenty or twenty-five fleeting years, at most, and you must face the Supreme Arbiter. I devoutly hope that you can justify your rulings at that times.

Very truly yours,

WALTER W. GALLINGHOUSE
