

Dear Mayor Allen -

Syracuse, N.Y.

We saw you in the midst of your trial by fire in your city a few nights ago on Walter Cronkite's National television news - and we felt we'd like you to know most of us Northerners are 100% behind you.

The misguided youngsters of our cities who rush down to march and to "help" get us together from thoughtful citizens - but oh how noisy those few are!

I wonder why it will take a Congressional investigation to find out why negro ~~employment~~ negroes going down? We were all in favor of most of their aims a year ago - but now - frankly - I and my family would be frightened to hire a negro.

You are one of the few courageous men -
God bless you! Yours respectfully -

Isn't this a terrible thing, an American admirer,
to prefer not to sign my name?

A decorative diamond-shaped logo with the letters 'R', 'B', and 'n' inside, centered over a background of faint, mirrored handwriting. The logo is composed of three interlocking diamond shapes, each containing a letter. The background features a repeating pattern of cursive script, likely a historical document, which is mirrored horizontally. The overall image has a vintage, parchment-like texture.
